- Very easy handling
- A clear view through the production

## The QAT

Articulated arm with tool panel. The perfect, all-purpose workstation that is always there, where it is needed.

### Large working radius - Small paths

The constructive implementation of QAT is against linearly guided Power rails systems, such as our Energy Line PS3, a large work area of up to 85m<sup>2</sup> covered. Thus, the operator has the option next to his tool, small and attachments, including compressed air, electricity, data management and lighting in a radius of almost 360 ° to carry with you. This costly downtimes are reduced to a minimum and effective work is ensured.

The tool panel is configured to customer specifications. It optimizes the workplace by keeping tools, carrying loads, energy provides, transported material and if necessary, holding the coffee cup. With minimal effort, it follows at every turn.
